Use the power of your voice with professional digital dictation

SpeechExec Pro Dictation and Transcription Software links authors and transcriptionists. It facilitates communication, the setup of individual workflow settings and organizational flexibility to help save time and resources. Authors can record directly into the software using a dictation microphone and transcriptionists can playback and conveniently transcribe these files using a foot control.

Efficient document creation

- Workflow management and automation for enhanced productivity
- Worklists for easy work monitoring and tracking
- Encryption and backup functions for highest security
- SpeechLive connection available for even greater mobility

Professional dictation solution

- Recorder for convenient direct dictation with Philips dictation microphones
- Flexible licensing to access SpeechExec from anywhere, including at home
- Automated file download for quick and convenient job routing
- Geared for professional speech recognition for highest accuracy

Powerful transcription module

- Transcription player with foot control support for hands-free playback control
- Individual sort and filter options for organization and task prioritization
- Popup alerts for notification of new important tasks

No 1 in SPS global
customer satisfaction
survey 09/2017.

Highlights

Efficient workflow management

Easily monitor and manage the workflow between authors and transcriptionists. Recordings and the resulting written documents are automatically routed to the appropriate person for quicker turnaround times.

Worklists and organization

Worklists help both authors and transcriptionists monitor their work statuses. They save time used for unnecessary status update communication between parties. Files can be organized into sub folders, assigned specific properties and comments and marked as urgent to help organize and prioritize tasks.

Data security and back up

Real-time file encryption (256 bit) and secure file transfer grant only authorized individuals to access documents. The optional automatic backup function protects data against accidental loss.

Seamless integration into SpeechLive

Philips SpeechLive cloud dictation workflow solution gives users constant file access via browser for greater flexibility and mobility. With SpeechLive, authors can dictate with their smartphone from anywhere and send dictations directly to their SpeechExec software. It also features a transcription service, where trained professionals quickly type up recordings for the author.

Integrated recorder and player

With the integrated dictation recorder, authors can record directly into their SpeechExec software. The software works perfectly with Philips SpeechMike Dictation Microphones and allows for quick and easy control of all recording and playback functions such as insert, overwrite and append. Function buttons can be individually programmed for added user convenience.

Always accessible

Licenses are now assigned to individual users, not to individual PCs, giving you the freedom to work from your desktop at work or from a laptop off-site. This also allows you to easily reactivate a license in case of a hardware failure.

Highlights

Automated download

SpeechExec Pro allows authors and transcriptionists to automatically download all their dictations from their voice recorder straight into the software and route to the appropriate destination via their local network, FTP server, SpeechLive or email.

Geared for speech recognition

Speech recognition software from Dragon can be seamlessly connected with solution. Whether the author is dictating directly into the software using a Philips microphone or uploading recorded files from a voice recorder, they will receive accurate speech recognition results which will help speed up their workflow.

SpeechExec transcription player

The software comes with a conveniently integrated transcription player with pause, fast forward and rewind options. Together with the configurable Philips Foot Control it allows for comfortable and quick transcription. Predefined templates can be used, so documents are automatically created with the appropriate header and footer, saving even more time.

Individual sort and filter options

Both author and transcriptionist benefit from individual sort and filter options to find dictations and documents even quicker and always stay highly organized.

New task notifications

Transcriptionists can receive alerts whenever new recordings are assigned to them, making sure no important recordings are missed. These notifications appear on their screen in real-time in a discreet popup window.

Versions

SpeechExec Pro Dictate

The module for authors including the integrated dictation recorder.

LFH4412: 2-year subscription

LFH4422: 2-year subscription (boxed version)

The module for transcriptions including the integrated player for transcriptionists.

LFH4512: 2-year subscription

LFH4522: 2-year subscription (boxed version)

Specifications

System requirements

Processor: Intel dual core or equivalent AMD processor, 1 GHz or faster processor

RAM: 4 GB (64 bit)

Hard-disk space: 100 MB for SpeechExec software, 4.5 GB for Microsoft .NET Framework

Operating system: Windows 11 Pro/Enterprise

Graphics: DirectX-compliant graphics card with hardware acceleration recommended

Screen resolution: minimum 1024 × 768 px with 100% DPI scaling, maximum 3200 × 1800 px with 150% DPI scaling

Sound: Windows-compatible sound device

Free USB port

Internet connection for required software activation

Headphone output or speakers

Additional system requirements for speech recognition software

Supported speech recognition software:

Nuance Dragon Professional 16 Individual/Group, Nuance Dragon Legal 16, Dragon Medical Practice Edition 4

Processor: Intel dual core or equivalent AMD processor, 2.2 GHz or faster processor

RAM: 4 GB (32 bit)/8 GB (64 bit)

Hard-disk space: 8 GB

Operating system: Windows 11 Pro/Enterprise, Windows 10 Pro/Enterprise (64 bit)

Convenience

Supported languages: English, German, French, Dutch, Spanish, Czech, Danish.

Finnish, Norwegian, Swedish

Automatic update via internet

Audio

Recording format: .dss, .ds2, .wav

Playback format: .dss, .ds2, .wav, .mp3, .wma

Workflow

File transfer: LAN, email, FTP, Philips

SpeechLive

Automatic download from portable voice recorders

Automatic file format conversion at download

Interface for automatic transcription with Dragon speech recognition software

Security

DSS Pro encryption: real-time AES encryption with 256 bits

SpeechExec encryption: AES encryption with 256 bits

Hardware configuration

Supported hardware: Philips SpeechAir Smart Voice Recorder, Philips PocketMemo Voice Recorder DPM8000 series, Philips SpeechMike Dictation Microphones, Philips SpeechOne Wireless Dictation Headset, Philips Foot Control

Configuration options: device option settings, configuration of slide switch and programmable buttons, keyword configuration, recording profiles, file download, encryption, PIN code protection
